DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 4-6 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 4-6 contain the limitations "means for receiving...means for decoding...means for indicating...means for indicating". These claims merely recite software per se, which is not permissible under the Examination Guidelines for Computers - Related Inventions.

Response to Arguments

2. Applicant's arguments, see pages 2-9 of the amendment, filed 05/15/06, with respect to the rejection(s) of claim(s) 1-3,7-10 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of the means plus function language used in claims 4-6, wherein the means of each limitation is directed to software by way of the specification.

Allowable Subject Matter

3. Claims 1-3,7-10 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-3,7-10 are allowed because of the following limitation 'wherein said processor is included in a device different from said embedded device'.
